Click under: Providers > Training

Watch the voiced over power point. You may watch it as many times as necessary, this is an open presentation test. Complete your test while reviewing the power point.

Once your test is completed and your abbreviations worksheet is completed you may schedule an appointment with a nurse by calling 616-527-1790. You will need to pass the test. Passing is less than 12 wrong. If you do not pass after 3 attempts your employer will be notified. You will *not* be able to take your Basic Health and Meds at the Right Door. We are only able to schedule Basic Health and Medication Tests on Fridays.

You will also need to pass the clinical piece of the Basic Health and Medications by demonstrating a blood pressure and taking a pulse. You will need to know normal ranges of a blood pressure and pulse. Even if this is not something you will need to do at your job it is part of our class and is a requirement to get your certificate.
